Project Title	Seagreen Wind Energy Ltd
Document Reference Number	LF000009-MIP-MA-MAN-NOT-0001

Seagreen Offshore Wind Farm.

Weekly Notice of Operations 45/2022

Issue Date – 7th November 2022.

Notice of Operations on Seagreen Offshore Wind Farm.

Work planned for the period 07-11-2022 to 13-11-2022.

Construction activities commenced on Seagreen Offshore Wind Farm on Thursday 17th December 2021 with works at the export cable landfall site. This notice will be updated weekly giving information of the progress and resources involved in the construction of the windfarm. The intention is to give notice of the activities involved in the construction phase of the project. Should anyone have any questions regarding construction operations we kindly ask that you put them forward well in advance.

The Seagreen Offshore Wind Farm is located in the outer Firth of Forth and Firth of Tay region of the North Sea. The site is situated approximately 17.5 nautical miles East-southeast of the Port of Montrose where the project Marine Coordination Centre will be located during the construction and operational phases. The first phase of the development will consist of 114 suction bucket foundation structures, with associated 114 10MW offshore wind turbine generators, 1 HVAC offshore substation platform, associated inter array and export cabling. The generated power will be transmitted to the National Grid via 3 subsea transmission

cables making landfall at Carnoustie, Angus, to the Southwest of the development site. Grid connection will be achieved at the Tealing onshore substation. The second phase of the project will consist of 36 piled foundation structures, with associated 36 Wind Turbine Generators, associated inter array and export cabling and one additional 1 HVAC offshore substation platform. The phase 2 transmission cable is proposed to make landfall at Cockenzie, East Lothian (subject to appropriate licensing).

The Seagreen development site is highlighted below in red, the export cable corridor is highlighted in blue.

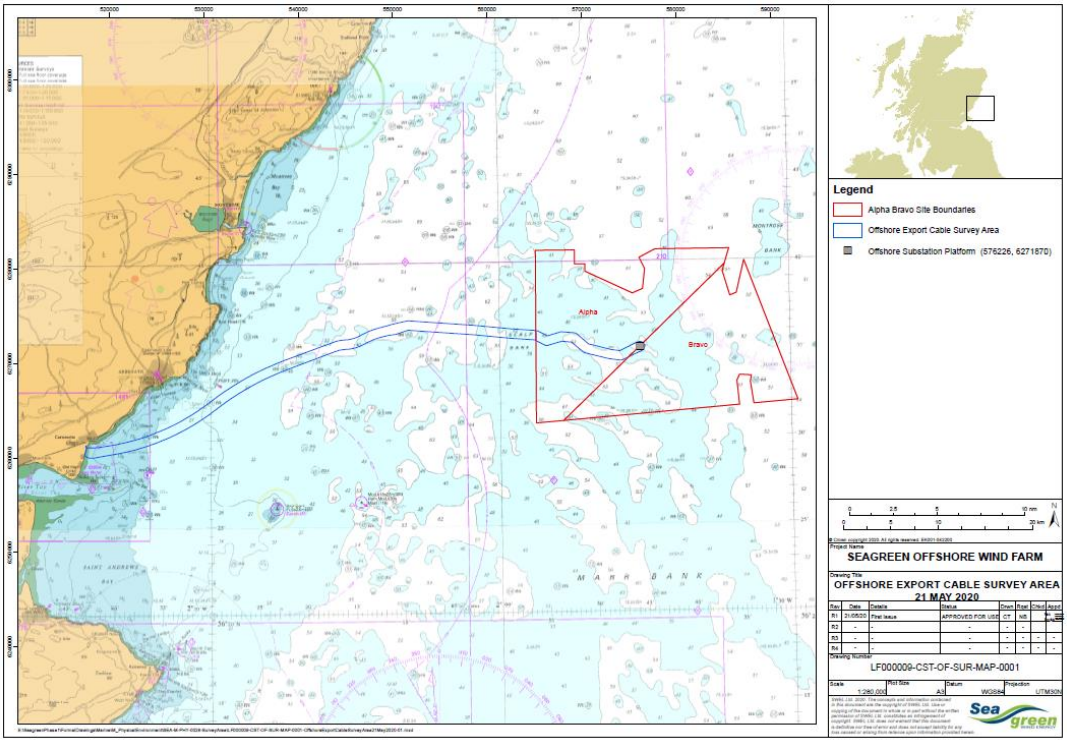

Fig 1 – Seagreen offshore wind farm location and export cable corridor.

1. Contact details for Marine Coordination

The following contact can provide more information if required.

Telephone Number (24/7 Operations)	+44 (0) 333 344 5255
Email for Marine Coordinator	seagreenmarinecoordination@sse.com
Address	Seagreen Wind Energy Ltd, O&M Building, Windy Waves House, South Quay Ferryden, Montrose, Angus DD10 9SL

2. Wind Turbine Generator Foundation Installation

On behalf of Seagreen Wind Energy Ltd. Seaway 7 will continue the installation of three-legged suction caisson wind turbine generator foundation structures. The foundation structures will be towed to the work site on barges from Nigg, Cromarty. On arrival at the Seagreen development site they will be installed by the heavy lift vessel Saipem 7000. There shall be a number of anchor handling tugs and barges involved in transporting the foundation structures from Nigg to the Seagreen work site. Details of the vessels are below. A table of installed foundation structures and their coordinates is shown in section 8.

Vessel – Saipem 7000 – Heavy Lift Vessel	Contact Details	
	Call Sign	C6NO5
	MMSI	309461000
	Vessel Details	
	Length	129.9m
	Beam	87.0m
	Draft	11.1m
	Vessel Contact	George Cooper- Seaway 7 07545 642881

Vessel – Carlo Martello- Anchor Handling Tug	Contact Details	
	Call Sign	IBCO
	MMSI	247266600
	Vessel Details	
	Length	55.4m
	Beam	15.5m
	Draft	5.7m

Vessel – Carlo Magno- Anchor Handling Tug	Contact Details	
	Call Sign	IBYF
	MMSI	247153600
	Vessel Details	
	Length	55.4m
	Beam	15.5m
	Draft	5.7m

Vessel – Ievoli Blue – Anchor Handling Tug	Contact Details	
	Call Sign	IBYK
	MMSI	242279900
	Vessel Details	
	Length	70.0m
	Beam	15.1m
	Draft	5.0m

Vessel – Seraya- Jacket Barge Tug	Contact Details	
	Call Sign	9HA4875
	MMSI	248942000
	Vessel Details	
	Length	51.8m
	Beam	15.0m
	Draft	

Vessel – Ocean Marlin- Supply Vessel	Contact Details	
	Call Sign	MIJX2
	MMSI	232031682
	Vessel Details	
	Length	66.8m
	Beam	16.04m
	Draft	4.5m

Vessel – Bear- Jacket Barge Tug	Contact Details	
	Call Sign	ORRV
	MMSI	205694000
	Vessel Details	
	Length	73.5m
	Beam	16.4m
	Draft	7.0m

Vessel – Sovereign- Jacket Barge Tug	Contact Details	
	Call Sign	ORQW
	MMSI	205644000
	Vessel Details	
	Length	67.4m
	Beam	15.5m
	Draft	7.0m

Vessel – REM Supporter – Supply Vessel	Contact Details	
	Call Sign	5BCN3
	MMSI	209051000
	Vessel Details	
	Length	94.1m
	Beam	20.0m
	Draft	5.9m

Barges	Contact Details	
	Call Sign	N/A
	MMSI	N/A
	Vessel Details	
	Length	122m
	Beam	36.5m
	Draft	N/A

2.1 Foundation Grout Installation

Seaway 7 will install grout to the wind turbine generator foundation suction caisson voids within the Seagreen site boundary. The supply vessel EDT Hercules will transport the grouting mix to the Seagreen site. The vessel will set up at the required foundation location and connect a grout hose to the suction caisson. The grouting mixture will then be injected into the caisson void. A remotely operated vehicle (ROV) will also be utilised in this operation.

Vessel – EDT Hercules – Grout Vessel	Contact Details	
	Call Sign	5BAM4
	MMSI	210776000
	Vessel Details	
	Length	88.8m
	Beam	19.6m
	Draft	5.9m

2.2 Foundation Scour Protection Installation

On behalf of Seagreen Wind Energy Ltd, Seaway 7 will install seabed scour protection rock to the wind turbine generator suction caisson foundation structures within the Seagreen site boundary.
The Flexible Fall Pipe Vessel (FFPV) Bravenes will transport the scour protection rock to the Seagreen site and install it on the seabed using a flexible fall pipe system. This allows scour protection to be installed around the suction caisson foundation structures to a high degree of accuracy. At the end of the fall pipe a remotely operated vehicle will be used to control the flow of rock to the seabed.

Vessel – FFPV Bravenes	Contact Details	
	Call Sign	PDCF
	MMSI	244860916
	Length	154.0m
	Beam	28.0m
	Draft	9.0m
	Vessel Contact	Onshore Rep: George Cooper George.Cooper@seaway7.com

3. Export cable works.

3.1 Export Cable Landfall works.

Works on the export cable protection pipes continues. Further details are below in section 2.2. The landfall works area is shown below in Fig 2.

Fig 2 – Landfall works area located at Carnoustie Barry Golf Links.

3.2 Nearshore export cable protection and diving works.

Operations on the self-submersible cable protection pipes continues. Works will be conducted from the DSV Sophie and the Tug Forth Warrior, vessel details below. All three Export Cables have been pulled in at the landfall site at Carnoustie, pulled into the offshore sub-station platform and trenched.

6 temporary anchors and 1 rock-net remain on the seabed to be used during nearshore export cable works. These are surface marked by day-glo pellet buoys. The coordinates and locations of the anchors are shown below in fig 3 and table 1.

Vessel – MPV Sophie	Contact Details	
	Call Sign	LK7943
	MMSI	258003500
	Vessel Details

Anchor 5 (1.5T)	56° 29.480' N	002° 42.651' W

Table 1 – Temporary anchor/rocknet coordinates.

3.3 Export Cable Installation

All three export cables have now been pulled into the offshore sub-station platform and trenched. One guard vessel remain on station to guard exposed sections of the export cables.

Rock armour protection will be placed on exposed sections all three export cables. The flexible fall-pipe vessel Rockpiper commenced rock placement operations on the 25th of September, vessel details below.

Vessel – Rockpiper	Contact Details	
	Call Sign	5BML3
	MMSI	209449000
	Length	158m
	Beam	36m
	Draft	6.7m
	Vessel Contact	Per-kristian.perderson@nexans.com

4.0 Offshore Platform (OSP) Topside Structure Hook up and Commissioning

On behalf of Seagreen Wind Energy Ltd, Petrofac will commission the Seagreen Offshore Sub-station.

The support vessel Norside Cygnus will transfer platform commissioning teams via the vessels' motion compensated gangway system. The crew transfer vessel MO6 will support operations.

Vessel – Norside Cygnus	Contact Details	
	Call sign	C6BW7
	MMSI	311000386
	Length	85.6
	Beam	22.4
	Draft	5.5
	Vessel Contact	Roy Nasr – Petrofac – 07494 809904

5. Inter Array Cable Installation.

On behalf of Seagreen Wind Energy Ltd, Seaway 7 will install and trench inter-array cabling between the wind turbine generator foundation structures and offshore sub-station platform within the Seagreen site boundary as shown in fig 1. The Installation Support Vessels Siem Stingray and Olympic Orion will support the cable laying vessel Seaway Phoenix. The crew transfer vessel Farra Lark will support Siem Stingray. Already installed inter-array cable details including coordinates of installed foundation structures can be found in Section 8.

Siem Stingray & Olympic Orion – These vessels will act as Installation Support vessels. Cable installation technicians will be deployed to the wind turbine generator foundation structures and ub-station platform using the vessels' motion compensated gangway system.

Vessel – Siem Stingray	Contact Details	
	Call Sign	LAFP8
	MMSI	258783000
	Length	120.8m
	Beam	27m
	Draft	6.5m
	Vessel Contact	George Cooper – Seaway 7 07545 642881

Vessel – Olympic Orion	Contact Details	
	Call Sign	LDEA3
	MMSI	257786000
	Length	93.8m
	Beam	20.0m
	Draft	6.2m
	Vessel Contact	George Cooper – Seaway 7 07545 642881

Seaway Phoenix – This vessel will install and trench the inter array cables between adjacent wind turbine foundation structures and the offshore sub-station platform. This vessel will also conduct pre-lay grapnel runs along the planned cable routes prior to installation.
Surface laid installed inter-array cable details including coordinates of installed foundation structures can be found in Section 8.

Vessel – Seaway Phoenix	Contact Details	
	Call Sign	2EEZ6
	MMSI	235084529
	Length	129.9m
	Beam	27.8m
	Draft	7.4m
	Vessel Contact	George Cooper – Seaway 7 07545 642881

5.1 Geophysical Survey Operations.

On behalf of Seagreen Wind Energy Ltd, Seaway 7 will conduct a geophysical survey of spare wind turbine generator positions and associated inter-array cable routes. The vessel will deploy towed survey equipment, all vessels are requested to give the Glomar Venture at least 500m clearance at all times, vessel details below.

1. Vessel – Glomar Vantage	Contact Details	
	Call Sign	HO3057
	MMSI	372867000
	Vessel Details	
	Length	56m
	Beam	12m
	Draft	3.5m
	Vessel Contact	George.cooper@seaway7.com

6.0 Wind Turbine Generator Installation & Commissioning.

On behalf of Seagreen Wind Energy Ltd, MHI Vestas Offshore Wind continue installation and commissioning of wind turbine generators. There shall be four vessels utilised during this operation.

The Jack-up vessel, Wind Orca, will install the wind turbine generator components.

The Service Operation Vessel (SOV) Acta Centaurus will provide accommodation for the WTG commissioning technicians. Personnel will utilise the Acta Centaurus's walk to work gangway system to access the WTG structures for commissioning activities. The Crew Transfer Vessels HST Harri and HST Euan will support the Acta Centaurus.

A table of installed WTG's and their coordinates is shown below in Section 8.

Vessel – Wind Orca	Contact Details

8. Construction progress update.

Please see below the current state of construction activity within the Seagreen site including coordinates of already installed assets, this will be updated weekly within this notice. Outside the issue of this notice updates can be obtained from the Duty Marine Coordinator, contact details are in section 1.

9. Guard Vessel Deployment.

In line with ongoing inter-array cable installation activities Seaway 7 have deployed two Guard Vessels. Six hourly VHF radio broadcasts shall be made containing information regarding the Seagreen development including installation activity, safety zone information and site demarcation buoyage information. Vessel details below.

Vessel – Genesis	Contact Details	
	Call Sign	MSDK3
	MMSI	235000097
	Length	27.4m
	Beam	8.54m
	Draft	2.5m

Vessel – Morning Dawn	Contact Details	
	Call Sign	MHEU3
	MMSI	232253000
	Length	44.9m
	Beam	9.0m
	Draft	5.2m

9.1 Export Cable Guard Vessels

In line with ongoing Export cable installation works there will be one Guard Vessel deployed to guard any exposed cable, vessel details below.

Vessel – GV Zenith	Contact Details	
	Call Sign	MGVE7
	MMSI	235008490
	Length	18.6m
	Beam	6.8m
	Draft	2.9m

10. Operations & Maintenance

Operations & Maintenance activities commenced last week as a number of wind turbine generators are fully commissioned. Technicians shall be deployed to service the WTG's and carry out any required trouble-shooting tasks. The Operations & Maintenance team shall be deployed to site aboard the service operations vessel Normand Fortress. The vessel shall remain on site with the technicians being deployed to the assets by motion compensated gangway. The port of operations shall be Montrose where the vessel shall crew change fortnightly, vessel details below.

Vessel – Normand Fortress	Contact Details	
	Call Sign	LIKW3
	MMSI	258537000
	Length	92.9m
	Beam	19.7m
	Draft	6.0m

11. Offshore Fisheries Liaison Officers.

During the construction phase of the Seagreen project there will be Offshore Fisheries Liaison Officers (OFLO) deployed on selected construction vessels. The principal role of the OFLO is to establish and maintain effective communications with any fishing vessels encountered and to monitor compliance with

good practice guidelines whilst doing so. The OFLO will record details of any fishing activity in and around the site including fishing vessels, gear and communications with fishing vessels and will provide regular updates to the Seagreen FLO. Please contact Seagreen Marine Coordination for further information.

12. Safety Zones.

Following consideration by Scottish government ministers it has been agreed that during the construction phases of the Seagreen development mandatory rolling 500m safety zones will be established around each Wind Turbine Generator and/or their foundations whilst construction works are in progress, as indicated by the presence of a construction vessel. The safety zones will be triggered whenever a vessel is on station at a WTG and undertaking construction activities.

In addition, mandatory pre commissioning 50m safety zones will be established around each Wind Turbine Generator and/or their foundations when construction works have been completed but prior to Wind Farm commissioning or where construction works have only been partially completed. These safety zones will be active at any structure during the construction phase where a construction vessel is not present at a Wind Turbine Generator.

13. Website

The official website for Seagreen Offshore Wind Farm can be found at

https://seagreenwindenergy.com

This contains all Seagreen Weekly Notices of Operations and Notices to Mariners, together with a large amount of general information about the project.

There is also a Twitter feed at @seagreenwind

14. Distribution List
