2. Activity description.

Seagreen Wind Energy Ltd. will conduct a subsea asset survey within the Seagreen offshore windfarm site boundary.

Survey activity will include WTG jacket foundation survey, Offshore Sub-station Location foundation survey and inter array cable burial survey.

The survey vessel Glomar Worker will continue works within the Seagreen site during the coming weeks. Vessel details below.

Survey data collection works will be supplemented by the use of unmanned Autonomous Surface Vessels (ASV). There may multiple ASV's working concurrently within the site boundary. An example is show below in section 4 including vessel details.

Two unmanned autonomous vessels are expected to arrive at the Seagreen site on or around Tuesday the 16th of July.

The only means of direct VHF communications with these vessels is on VHF channel 16.

If any Seagreen project vessels require to interface with the USV's they should contact Seagreen Traffic on VHF Private Channel 1.

5. Safety Zones

As all the Seagreen Wind Turbine Generators are fully commissioned, mandatory 500m safety zones shall be established around any WTG where major maintenance work is being undertaken, where major maintenance is as per the definition given in the 2007 Regulations. The safety zones will be active whenever a major maintenance vessel is at the WTG during the operational phase. Up to five of these safety zones could be concurrently active, but no more than four where there is one active 500m safety zone around the Offshore Sub-station Platform.

A mandatory 500m safety zone shall be established around the Offshore Sub-station Platform where major maintenance work is being undertaken, where major maintenance is as per the definition given in the 2007 Regulations. The safety zone will be active whenever a major maintenance vessel is at the OSP during the operational phase.

MARINERS ARE REMINDED to navigate with caution and keep continued watch on VHF Ch.70/16 when navigating the area.

6. Distribution List
