#### 1. Area of Planned Activity.

Marine Scotland Science intend to undertake Offshore Wind Farm environmental surveys around the Seagreen Offshore Windfarm site, and wider Firth of Forth and Tay areas as part of the PELAgIO programme of works. PELAgIO is a three-year project, led by the University of Aberdeen and co-funded by the Natural Environment Research Council (NERC) and The Crown Estate (TCE), that will help improve understanding of how OWFs may influence marine productivity and, consequently, fish, bird, and marine mammal distributions.

## 4. Safety Zones

Following consideration by Scottish government ministers it has been agreed that during the construction phases of the Seagreen development mandatory rolling 500m safety zones will be established around each Wind Turbine Generator and/or their foundations whilst construction works are in progress, as indicated by the presence of a construction vessel. The safety zones will be triggered whenever a vessel is on station at a WTG and undertaking construction activities.

In addition, mandatory pre commissioning 50m safety zones will be established around each Wind Turbine Generator and/or their foundations when construction works have been completed but prior to Wind Farm commissioning or where construction works have only been partially completed. These safety zones will be active at any structure during the construction phase where a construction vessel is not present at a Wind Turbine Generator.

**MARINERS ARE REMINDED** to navigate with caution and keep continued watch on VHF Ch.70/16 when navigating the area.
