## 2. Activity Description

Unmanned vessel X-20 shall survey around the WTG foundations of SN -S11 and SN-G07 and several other locations within the Windfarm boundary.

X-24 utilised as a reserve vessel.

Operations will take place subject to weather and other operational factors from 14<sup>th</sup> April for approximately 7 days. In addition to the survey area, the USVs will transit to/from the port of Eyemouth or Arbroath. A support vessel will escort the USV from the harbour entrance until open water. The USV will then continue transiting towards the survey site. It is requested that other vessels remain clear, so far as is practicable, during transit & survey operations.

The only means of direct VHF communications with the vessel is on VHF channel 16.

If any Seagreen project vessels require to interface with the USV's they should contact the Duty Marine Coordinator at Seagreen Traffic on VHF Private Channel P1

### 4. Safety Zones

As all the Seagreen Wind Turbine Generators are fully commissioned, mandatory 500m safety zones shall be established around any WTG where major maintenance work is being undertaken, where major maintenance is as per the definition given in the 2007 Regulations. The safety zones will be active whenever a major maintenance vessel is at the WTG during the operational phase. Up to five of these safety zones could be concurrently active, but no more than four where there is one active 500m safety zone around the Offshore Sub-station Platform.

A mandatory 500m safety zone shall be established around the Offshore Sub-station Platform where major maintenance work is being undertaken, where major maintenance is as per the definition given in the 2007 Regulations. The safety zone will be active whenever a major maintenance vessel is at the OSP during the operational phase.

**MARINERS ARE REMINDED** to navigate with caution and keep continued watch on VHF Ch.70/16 when navigating the area.
