

3 Developing in partnership

In June 2020, we announced that the final investment decision had been taken to proceed with the construction of Scotland's largest offshore wind farm, which will power around 1 million homes and further the UK's ambition to deliver 40GW of offshore wind by 2030.

With an expected investment of around £3bn, we also announced that the Seagreen offshore wind farm development will be taken forward together with a new Joint Venture Partner, Total, with whom SSE Renewables entered in to an agreement to sell a 51% stake in Seagreen 1.

SSE Renewables will continue to lead on the development and construction of the project, supported by Total, and will operate the wind farm on completion, which is expected in summer 2022.
