2. Activity Description.

On behalf of Seagreen Wind Energy Ltd. Seaway 7 will deploy temporary construction site demarcation and wave data buoys.

The Seagreen offshore wind farm will be marked and lit as a construction area during the construction phase of the project via the use of temporary construction buoyage. This will be a combination of cardinal marks and special marks as shown in Figure 1. Coordinates and specifications of each buoy are then given in tables 1 & 2. At NLB request, the cardinal marks at each corner of the development site will transmit via Automatic Identification System (AIS).

Three wave data buoys will also be deployed in the coordinates listed in table 1 and shown in Fig 1. These buoys will provide real time wave data within the development site.

The supply vessel Kingdom of Fife is expected on site to commence the buoyage installation on or around the 7th of September, further details of the Kingdom of Fife are below in section 3.
